

# 3v2 “KLOPP INSPIRED” SHOOTING DRILL

[www.onside-training.com](http://www.onside-training.com)

- Arrange 3 cones in a line approximately 10 meters outside the box, representing a striker and two wingers.
- Position two small goals on each side of the pitch outside the box.
- Have a minimum of 2 attacking players at each cone.
- Have a minimum of 2 defenders behind the goal line on each side of the goal.
- Adjust distances between cones based on the age and skill level of the players.

## Why Use This Drill?

This 3v2 “Klopp Inspired” Shooting Drill is designed around the principles observed in Jürgen Klopp's gegenpressing Liverpool team. It emphasizes the quick transition of defenders after winning the ball, and moving the ball away from the danger zone and into the "goals" on each side, representing full-backs or midfielders.

The drill provides players with an understanding of playing out of a pressing area after gaining possession. Simultaneously, it offers a standard 3v2 attacking scenario for the attackers to train their goal-scoring opportunities and connection between the attackers.

# 3v2 "KLOPP INSPIRED" SHOOTING DRILL

## How It Works

- One of the two defenders starts the game by passing the ball to one of the three attackers positioned at the cones.
- Upon receiving the ball, the attackers engage in a 3v2 attacking scenario.
- Defenders quickly move up towards the attackers, maintaining compactness and readiness to win the ball.
- Attackers aim to score swiftly, employing various runs to surpass the defenders. (Experiment with various running patterns)
- If defenders win the ball, their objective is to promptly get it into one of the small goals on each side of the pitch.
- Attackers earn 1 point for scoring a goal, while defenders earn 2 points for scoring in the small goals. The first team to reach 10 points wins. (Modify the scoring system to suit your team if it appears unfair to either side.)
